

# DBHDS Delta Portal

Delta is a Web-based Security Portal that will connect users to various DBHDS applications. There are several roles within DELTA that are explained below.

***Security Officer:*** This role can process account requests for their locations (except for their own account) and perform user functions. They can also perform administrative resets on accounts. This role is location specific.

***Supervisor:*** This role can submit account requests for their location (except for their own account) and perform user functions. This role is location specific.

***Local Admin:*** This role can process application access requests for their application and their location (except for their own account) and perform user functions. This role is location specific.

***User:*** This role can log in and maintain their account information. They can access applications that they have been granted access to by their local administrator. This role is location specific.
